The Pre-Mortuary Science program offered at UMN Crookston is a collaborative effort between the University of Minnesota Crookston and Twin Cities campuses. Students will take classes at UMN Crookston for their first two years, then will apply for admission to the Program of Mortuary Science at the Twin Cities campus to complete their final two years of education. Upon completion of the program, students are prepared to pursue a rewarding career as a funeral director. As a funeral director, you will serve bereaved members of the community in a manner that is proficient, dignified, and caring.

**EDUCATION & TRAINING**
Each state has its own funeral director licensing regulations. Most require a combination of post-secondary education (Associates or Bachelor’s Degree program accredited by the American Board of Funeral Service Association), the passage of the National Board Examination, and a 1-2 year internship within a funeral home, and completion of the national board and/or state licensing examination. Minnesota requires passing the State Licensing Exam and both the Arts and Science sections of the National Board Exam.

**CAREER OPPORTUNITIES**
A mortuary science degree prepares you for a rewarding career as a funeral director. As a funeral director, you will prepare descendants for their final resting place (embalming and restoration, cremation). You will also work with families of the recently deceased before and during the funeral and assist with preplanning funeral arrangements. Your job will be to provide guidance and a meaningful experience to people during a devastating time in their lives.

On a national basis, there are generally more jobs available than there are licensed funeral directors to fill them.

**PROGRAM FEATURES**
- Prioritized admission to the UMN Twin Cities’ Program of Mortuary Science.
- 2+2 Program:
  - Students will start at the Crookston campus and complete general education courses before transitioning to the Twin Cities campus for Mortuary Science courses.
- Earn a University of Minnesota degree and only 1 of 4 Bachelor of Science degrees for Mortuary Science in the U.S.
- 98% job placement for University of Minnesota Mortuary Science Program graduates.
- Alumni network of 4,400 program graduates.
PROGRAM REQUIREMENTS & CURRICULUM
